

FITTING CHAMPIONS

HIGH IMPACT SPORT

Netball is a high impact "stop-start" sport with sudden changes in direction, rapid acceleration and jumping, resulting in a high level of stress being placed onto your feet and legs.

Being fitted into the correct netball shoes, designed specifically for the rigorous demands of the game, is important to reduce lower limb stress and keeping you playing at your best.

FITTING TIP:

Bring any bracing or strapping that you wear with you in store when trying on new netball shoes.

NO TWO PLAYERS ARE THE SAME

Everyone has their own unique style when playing netball. The diverse movements, dictated by your on-court position, results in different areas of pressure being placed onto your feet and footwear.

The Athlete's Foot Fit Technicians are expertly trained in fitting the right type of netball shoe to your individual foot's needs, resulting in added comfort and performance.

FITTING TIP:

There are a number of lacing techniques which will help to customise the feel for added stability.

IMPORTANT FEATURES

CUSHIONING

The force applied to your feet and legs when stopping suddenly during a netball game can exceed your body weight by up to 6 times. Cushioning is one of the most essential features of a netball shoe providing shock absorption and decreasing the level of stress applied to the lower body.

STABILITY

With so many high impact movements on top of sudden changes in direction, stability is important in a good netball shoe. Shoes with supportive foot bridges and firm heel counters will allow your foot to fit firmly inside the shoe.

TRACTION

Netball is played on a variety of surfaces. A good netball shoe outsole will provide strong grip to assist with multi-directional play.

DURABILITY

Sport specific flex grooves help to assist a netballer with movements such as pivoting, and when combined with a wrapped outsole, can improve the durability of the shoe.
